

God is neither Hindu, nor Christian nor Jew nor Buddhist etc. However, Devil does have these various shades such as Hindu, Christian or Buddhis etc.

GOD is bigger, better, & almighty than Devil by manifolds! That's why we call God is mightier or almighty as compared to Devil.

GOD(G) = ∞^0 = Almighty = G^0 = Limitless in all directions

DEVIL (D) = 0 to +1 Or -1

DEVIL (D) = In any case, not more than Trillion of Trillions. In Positive or Negative Directions

Don't attach yourself to:

- A person
- A project
- A company
- A organization

Attach yourself to:

- A goal
- A calling
- A mission
- A purpose

LAW OF ATTRACTION.

Your mind is a magnet. If you think of blessings, you attract blessings, and if you think of problems you attract problems.

Always cultivate good thoughts and remain positive.

NCE

C . Bhardwaj

New Symbol

$\infty^0 = G^0 = Almighty$

God vs Devil

No	Godly Person (s)	Devil (s)
1	Is above religious fundamentalism	Is Not above religious fundamentalism
2	Godly person is not fragmented into small mentalities. This mindset produces elites and multi-national corporations. Since these mindsets are focused. They have high self-esteem. Strong minds. They lift all up.	This mindset is fragmented and can't unite for common causes. They fight and fight endlessly. These mindsets produce Hitlers, extreme selfish people. They fight like pigs, dogs and cats for what they deserve. They don't uplift their ordinary fellow community beings.
3	These mindsets enjoy the company of each other & try to build society by pooling resources and efforts together by thinking of innovative solutions to human problems.	These mindsets are opposite in every corresponding aspect or virtues or moralities of happy living. These mindsets can't get along at human level. They would rather be friends with pet animals like cats and dogs than human beings. These people tend to cheat and destroy societies or nations.
4	Creates happy life, innovation, and good ideas. They are collaborative in every aspect of their happy life.	Create problems, and cause wastefulness, by using dominant behaviors.
5	No pain and no gain, this is what it means, all win or share risks of loss together. The differences in rewards in the form of salary are NOT extreme. In other words. The pay of CEO and its employees is reasonable/fair.	No pain and no gain, this is what it means, all wins are for CEO and most or all of pains are for employees. The ratio or pay gap is extreme and out of CONTROL.
6	Free Speech & open debate is NOT free this group understands very well. It's okay to agree <u>to</u> disagreements provided there is goodness for all parties involved.	There is a big disconnect about realities or responsibilities of what is spoken out of these minds. These minds are never apologetic and are very stubborn and dogmatic, tyrant or obnoxious.
7	Be good and do good, and goodness will return to those who practice these behaviors.	Divorce rate is higher for these mindsets and hence more pain for less fortune individuals.

$1G^0 = 1 \text{ Trillion} = 10^{+12}$ → **Reference Equation (RE) #1**

1. If Almighty can be assigned 1 trillion degrees, then how about little humans measure up to the almighty. These equations can be used in algorithms for AI simulation to come in the future.
2. In case of ordinary humans, the numbers can be assigned for each community or group. Lets say it is 10^1 . So for ordinary person or a sinner/devil/monster etc. $10^{10} = 100G^0$

$G^0 = 100$ Any humans' 100 deg G, and G^0 is a degree of godliness

NOTE: A human with capacities of 10. The capacities consist of the values of these factors, positive mindset degree, (1) power of individual's Creativity (value), (2) A degree of Innovative mindset and (3) Expertness based upon public work/experiences, if all these three values produce value of 10. then we can calculate degree of godliness of any individual or corporation(s). Number for calculation will consist of these components "base", x numbers and exponential y numbers values can be different, however, for this example let's say these are equal , **x=10= C+I+E and y=10(C+I+E)**

A number value of 10= Degree of Creativity select from range / scale of 1 to 5, (5)+ Degree of innovationist mindset (range of 1 to 5) 3, + Expertness and public work factor (range 1 to 5) 2 shall produce a value =10

Generalized form of this formula will be

$G = x$ and $O = y$

For $x=10$ and $O = y$

Theory of Proportions[™]

Hypothesis God and Devil (sinners)

ABSTRACT: When there are extremely large numbers, especially, when we speak of God, the Almighty and we the humans (sinners). Just to have relative or proportionate or comparative some sort of index or register/index or perspectives /viewpoints. You may call it **“Theory of Proportions[™]”**, it’s behaviors of humans in terms of viewpoints of all religious fundamentalisms.

VIEWPOINTS:

Description of ABSTRACT in mathematical viewpoints.

Let’s initiate understanding of the concepts described in page 1 of 4 of this writeup.

NOTE: A human with capacities of 10. The capacities consist of the values of these factors, positive mindset degree, **(1)** power of Individual’s Creativity (**I**=3, range is 1 to 5), **(2)** A degree of Innovative mindset (**In** = 5, value range is 1 to 5) and **(3)** Expertness based upon public work/experiences (**E**=2, value range is 1 to 5) , if all these three components of human’s behaviors & values, produce value of 10. then we can calculate degree of godliness of any individual or individuals or corporation(s), relative to God or for humans we can call it, degree of godliness.

EXAMPLE:

The values for the exponent number, a value of 10, when all these three components that includes, **(I)** Degree of “Creativity” select from range of 1 to 5 [**C**=3 {3}], **(II)** value for Degree of Innovationist mindset (range of 1 to 5, = 5), **(III)** the values for Expertness and public work factor (2, range 1 to 5) shall produce a value =10

$$\text{Exponent} = \mathbf{C} + \mathbf{In} + \mathbf{E} = 3 + 5 + 2 = 10$$

BASE: The base values may not necessarily be equal to exponent portion of the degree of godliness. It's important to understand the components for Base number are, (I) **E**ducation the range is 1 to 5, (II) **N**ationality, the range is 1 to 5, (III) person is ordinary or extraordinary [O= 1 to 5)]. Let's say all components are maximum and Base = 15

Base = (Ed+N+ O) and Exponent = (C+ In + E)

In this case the values for degree of godliness is equal to $15^{10} = 576650390625$

In case GOD, let's say the practical value is $10^{24} = 1$ with 24 zeros

The ratio is $10^{24} / 15^{10} = 1\ 734\ 152\ 991\ 1583.3$.. in this case God is mightier by a ratio number of **1 734 152 9911583.3 G⁰**

Figure 1 : The ratio of God's abilities and humans

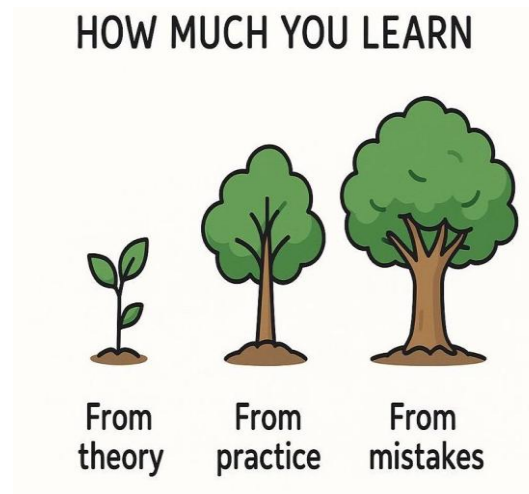

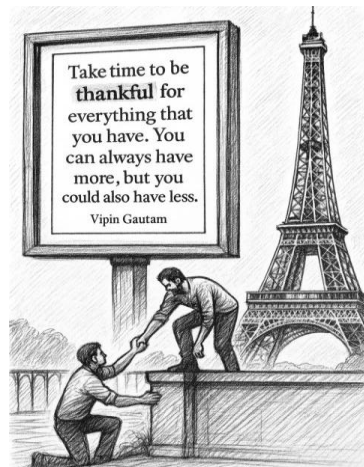

What does it mean? The God is mightier by **1 734 152 9911583.3 G⁰** this number as compared to calculated value for a godly person 576650390625

NOTES:

- 1 The practical use for calculations of say what's the degree of democracy from this writeup is as follows.
- 2 In case of perfect democracy, the base=100, and exponent values are in the range of 1 to 10
- 3 In case of perfect democracy, the number shall be 100^{10} , So for all democracies the base will always be equal to **100**. In case of ABSOLUTE dictatorship base will be equal to = 50
- 4 For God, Base= X=100 (Minimum) to ∞ , and exponent is Y=100 (minimum) to ∞ . Here ∞ means no limit for God. Just to be practical 100 and 24 are used to show the magnitudes. These numbers work both ways that is **(negative, -) ∞ to $+\infty$** , both X and Y for almighty are, **- ∞ to $+\infty$** .
